Opus International Consultants on behalf of Timaru District Council is looking at options for providing for further industrial development in the Meadows Road, Seadown Road area of Washdyke over the next 30 years. This builds on previous investigations into industrial growth trends and infrastructure feasibility undertaken during the past 12 months.

The Council wants to provide a strategic blueprint for future industrial growth in this area of Washdyke in a co-ordinated manner. The study will involve discussions with key stakeholders and a public open day in early December. This process will ultimately require a change to the Timaru District Plan.

Opus International Consultants has been assisting Council with this work. The community consultation will be undertaken by Opus on behalf of Council. Further information can be obtained by contacting Gemma Smith on 0800 553 255 or via the Opus Timaru Office on 684 8539 or via email gemma.smith@opus.co.nz.
