Canterbury Regional Council (Environment Canterbury)	183.28	Planning Maps	Flood Hazard Risk		Amend	Considers that the areas identified as potentially subject to flooding are too narrow. Revised mapping is recommended.	Amend the planning maps to encompass a wider area potentially subject to flood hazard risk.	The revised flood map was not provided until Hearing F. the Panel is concerned that landowners in the revised areas may not have reasonably foreseen that they would be impacted by Environment Canterbury's proposal. The Panel therefore directed the Timaru District Council to publicly notify the updated flooding information for further submissions, so those affected can have their say.
