

Infrastructure Approved Contractors

Your Go-To Guide

Version: 34
Date: 19 March 2024

Why do you have to use an Infrastructure Approved Contractor?

Timaru District Council holds a register of approved contractors. This ensures:

- Work on Council assets is carried out to a suitable standard.
- Obligations under the Health and Safety at Work Act 2015 are met.
- Land owners and developers are provided with a choice of service providers when arranging for connections to Council assets.

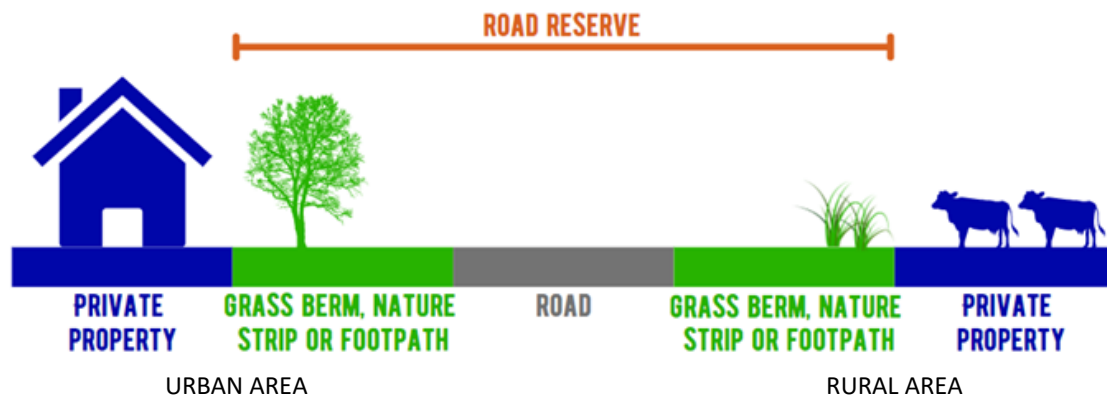

All physical work on Council-owned infrastructure (including future infrastructure that will later be vested in Council) must be carried out by TDC approved contractors.

The register of approved contractors ensures that work is only carried out by experienced contractors with appropriate knowledge of Council specifications, training and safety systems.

Details on how to become an approved contractor can be found on Council's website: www.timaru.govt.nz/approvedcontractor

What is the road reserve?

The road reserve is the area of land (including the road) between property boundaries:

On behalf of ratepayers, Timaru District Council owns all road reserves in the Timaru District, except for State Highways (these are owned by Waka Kotahi/New Zealand Transport Agency). Just like our parks, footpaths and water treatment systems, road reserves are a public asset.

Disclaimer

- This Infrastructure Approved Contractors list is subject to change without notice.
- Council does not have any role in the commercial relationship between contractor and the client.
- The contractors are “approved” only in their identified categories, as far as working on Timaru District Council’s network infrastructure assets.
- Contractors undertaking work on Council’s infrastructure must be Council approved in the specific field at the time of physical works.
