Milward Finlay Lobb	60.60.	The Proposed District Plan has extracted data from the Canterbury Regional Council "Community Drinking Water Protection Zones". This mapping data base changes, and has changed , but once the Proposed District Plan is operative, a Plan Change would be required in every instance the Canterbury Regional Council "Community Drinking Water Protection Zones" changes.	Support	<p>As a specific example, The Proposed Timaru District Plan had extracted data, specifically The Pareora Huts zone from the Canterbury Regional Council "Community Drinking Water Protection Zones". This extraction is out of date, given the updated/revised Canterbury Regional Council "Community Drinking Water Protection Zones" has that area removed as it was an error (refer below). The Proposed Timaru District Plan still defines this area but does not reflect the current operative Canterbury Regional Council "Community Drinking Water Protection Zones".</p> <p>Refer below providing the background for the removal of The Pareora Huts zone from the Canterbury Regional Council "Community Drinking Water Protection Zones"</p> <p>From: Risk <helen.risk@ecan.govt.nz> Sent: Wednesday, November 16, 2022 To: <alpine@xtra.co.nz></p> <p>Hi Peter & Jane</p> <p>Please see below email from our Groundwater Science Team regarding the Pareora Huts supply and the Community Drinking Water Zone.</p> <p>This is written confirmation that protection zone should be removed from the GIS mapping system later this week or early next week and doesn't require a plan change.</p> <p>But bearing in mind there is still the supply at Pareora Huts and to be operating at GMP on your farm to help mitigate any water quality risks. I have attached the pre FEP audit checklist for you to go over before an audit which is scheduled for October next year.</p> <p>Any further correspondence regarding this please contact me.</p> <p>Kind regards</p>	Allow in full	Remove the Proposed District Plans' inaccurate and outdated extraction of data from the Canterbury Regional Council "Community Drinking Water Protection Zones" and refer to the Canterbury Regional Council database to define the extents of "Drinking Water Protection Area". This avoids duplication of information or incorrect extents and ensures the operative District Plan is always consistent (through reference to it) with the Canterbury Regional Council "Community Drinking Water Protection Zones", versus a Plan Change every time the Canterbury Regional Council "Community Drinking Water Protection Zones" changes.
