

CWMS Zone Committee Workshop – Orari-Temuka-Opihi-Pareora

8 April 2024

Context – Our approach

- Focus ‘review’ on analysis of **future needs** and **fit-for-purpose solutions**
- Key focus points:
 1. Clarify **local leadership needed** to deliver freshwater outcomes in the future.
 2. Determine **structure, function and resources** required to support local leadership.
- Follow **collaborative approach** with **mayors, mana whenua**, and **zone committees**
- Preliminary report in **May – June** and final reporting in **Nov – December 2024**

Today's session

- Initial discussion around local freshwater leadership
 - It won't cover everything
 - Feel free to add comments or questions via post-its
- Short anonymous survey coming soon if you want to share more thoughts
- Feel free to also contact us to discuss further

Discussion

- What local leadership is needed to deliver freshwater outcomes in the future?
- What different types of local freshwater activities and groups are in your zone?
 - What do they focus on and do well (or not)?
- How does your Zone Committee fit in among the different groups?
 - What challenges and opportunities are there?
- What does mana whenua engagement look like for your zone's groups?
