

## PORT ZONE

### Introduction

The Port Zone is located on the seaward side of the Main South Line ~~Railway Line in Timaru~~, generally between Marine Parade in the north, and Queen Street in the south. It encompasses the core port operational harbour areas (PREC712 - Port Operational Area Precinct), logging yard and fuel storage areas, and adjacent land that accommodates industrial activity and supporting commercial activity that predominantly has a physical or functional connection to the Port. The Port Zone recognises and provides for a range of port and port-related activities that are dependent on a location within or adjacent the coastal environment, and which are compatible with the adverse effects generated by port activities. The Port Zone also recognises the important contribution the Port of Timaru makes to the Timaru District's economy, as Regionally Significant Infrastructure.

### Objectives

#### PORTZ-O1 Purpose of the Port Zone

The Port Zone provides for the establishment and operation of the Port of Timaru and the establishment, operation and growth of a range of industrial activities and other compatible activities that:

1. contribute to the economic wellbeing of the District; ~~and~~
2. do not compromise the strategic role and function of any of the ~~C~~ommercial and ~~M~~ixed ~~U~~se ~~Z~~ones; and
3. maintain the amenity values of adjacent ~~P~~residential ~~Z~~ones and ~~O~~pen ~~S~~pace and ~~P~~recreation zones.

#### PREC712 - Purpose of the Port Operational Area Precinct

##### O1

The efficient and effective operation of the Port of Timaru is enabled to support its role as regionally significant infrastructure, recognising:

1. its significance to the economic well-being of the Timaru District; and
2. its reliance on its location within and adjacent to the coastal environment; and
3. that adverse effects on sensitive environments are mitigated as far as practicable.

### Policies

#### PREC712 - P1 Port operation, use and development

Enable the efficient operation, use and development of the PREC712 - Port Operational Area Precinct operational area of the Port of Timaru by:

1. enabling a range of port activities and ancillary activities that support port activities; and
2. recognising the limited land area available for activities that rely on proximity to the Port and infrastructure of the Port; and
3. discouraging the establishment of non-industrial or non-port activities that:
  - a. do not have a direct relationship with the ~~C~~oastal environment, or the Port of Timaru; and
  - b. require a higher standard of amenity that may be sensitive to or result in conflict with existing or permitted activities in the Port Zone; or
  - c. would compromise the safe and efficient use and operation of the Port of Timaru.

#### PORTZ-P1 Compatible activities in the Port Zone

Enable activities that are compatible with the purpose of the Port Zone by:

1. providing for industrial activities which are not Port activities that:

- a. are outside of the ~~PREC712 - Precinct~~ Port Operational Area ~~Precinct~~ or have a functional need or operational need to be located in the Precinct ~~Port Operational Area~~; and
- b. will not undermine the efficient and effective operation of the Port, including by avoiding any activities that may give rise to reverse sensitivity effects on the Port; ~~and~~

2. providing for commercial activities with a functional need or operational need to be located in the Zone that:

- a. directly serve the needs of workers employed in the Port Zone; or
- b. involve the sale of boats, products related to the marine industries, or associated equipment; or
- c. involve products made or processed on-site; or
- d. office activities that are for the administration of the Port of Timaru, or those associated with and ancillary to industrial activities or commercial activities; and

3. only allow for residential activities in instances where they:

- a. are ancillary to ~~Port~~ activities on the site; and
- b. have a functional need or operational need to locate on site; and
- c. have measures to avoid reverse sensitivity effects on ~~Port~~ activities and industrial activities; and
- d. occupy a minimal area of the site.

#### **POR TZ-P2      Effects of ~~Port~~ activities**

Provide for ~~Port~~ activities within the Port Zone where adverse effects generated from port activities are mitigated as far as practicable on adjoining zones, Council reserves and the coastal environment, while recognising the functional needs of ~~the~~ Port operations.

#### **POR TZ-P3      Offensive trades**

Only allow offensive trades to establish in the Port Zone where:

1. the activity is located in a manner that will maintain the amenity values of adjacent zones; and
2. the activity and buildings ~~are~~ is designed in a way that contains or minimises nuisance effects.

### **Rules**

**Note:** For certain activities, consent may be required by rules in more than one chapter in the District Plan. Unless expressly stated otherwise by a rule, consent is required under each of those rules. The steps plan users should take to determine what rules apply to any activity, and the status of that activity, are provided in Part 1, HPW — How the Plan Works - General Approach.

<b>POR TZ-R1      Port activities</b>
